DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group IIA in the reply filed on 06/08/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 127 is rejected under 35 U.S.C. 102(b) as being unpatentable by Atobe et al. (US Patent 6,452,712).

Regarding claim 127, Atobe (figure 2) is interpreted as disclosing a spatial light modulator comprising an array of micromirrors, each micromirror comprising a mirror plate **102a** that comprises four predominant sides and being held on the substrate by a plurality of posts **210**, wherein the four predominant sides define two diagonals, and wherein a line connecting the centers of any two of the plurality of posts is not coincident with either of the two diagonals of the mirror plate.

Response to Arguments

3. Applicant's arguments filed 06/08/05 with respect to the claims have been fully considered and are persuasive. The previous rejections of these claims have been withdrawn.

Allowable Subject Matter

4. Claims 1-22 and 63, 64, 66-74 are allowed in view of the Applicant's amendment and arguments. Claims 128-133 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter.

Regarding claims 1 and 129, the prior art fails to disclose that the mirror plate is attached to a hinge that is supported by a post of the plurality of posts on the substrate, and wherein the mirror plate and hinge are separated by a gap in a direction perpendicular to the mirror plate when the mirror plate is parallel to the substrate.

Regarding claims 63 and 128, the prior art fails to disclose that each side of the mirror plate is at an angle of from 5 to 25 degrees to the two predominant sides of the rectangular substrate.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
